Hello world...

Got any plans this summer?

We do!

**Summer at the Robot Factory will be better than ever,
and here's why:**

Summer will consist of three 3-week sessions (for a total of 9 weeks -- the specific dates are below).

One session will be all about **Lego Mindstorms EV3**, where we'll have a quick rundown of the basics, tackle some tasks and obstacle courses, and have a "battlebots" tournament.

The next session, we'll learn some programming basics, figure out how to solve some problems, and make our own games. No experience required - we'll be using Scratch and Python.

During the last session, we'll learn about the **Arduino** and work on some big team projects. This will be intense, so we'll have to work on managing our time as well. It's recommended that your child takes at least one of the previous summer sessions before doing this one, unless he/she has experience with microcontrollers.

Summer Schedule:

Mindstorms EV3 session

June 6-8, 13-15, 20-22
Tues-Thurs. 10am-2pm

Programming session

June 27-29, July 4-6, and July 11-13
Tues-Thurs, 10am-2pm

Arduino & other projects

July 18-20, 25-27, Aug 1-3
Tues-Thurs, 10am-2pm
